### ABOUT THE DEPARTMENT

The department of Political Science is one of the core Department of our college. It was established in 2006 to carryout UG Courses in Political Science. The Department of Political Science envisages students' enrichment with knowledge and skills for critical and logical thinking to understand real world problems and contribute some meaningful ways for social wellbeing.

### ABOUT THE COURSE

Democratic awareness thrives through local self-government, empowering citizens to actively participate in decision-making processes. From town hall meetings to grassroots initiatives, it fosters community engagement, transparency, and accountability. Through such governance structures, individuals learn the value of civic responsibility, shaping a society where voices are heard and represented at every level.

Course Details

- **Course Title:** Add-on Certificate Course on “Chemistry for Sustainable Future”.
- **Duration:** 32 hours
- **Course Date:** 08/12/2021 to 18/12/2021
  
- **Objectives:**
  1. Introduce students to the fundamentals of sustainable chemistry and its relevance to rural communities.
  2. Explore local sustainability issues and identify opportunities for chemical interventions.
  3. Equip students with practical skills to implement sustainable chemistry solutions in rural settings.
  4. Foster an interdisciplinary approach by integrating chemistry with other relevant fields such as agriculture, water management, and renewable energy.
  5. Empower students to become agents of change by proposing and implementing sustainable projects within their communities.
  6. Cultivate an awareness of ethical, social, and cultural considerations in the application of chemistry for sustainable development in rural India.
  
- **Expected Outcomes:**
  1. Understanding of Sustainable Chemistry Principles: Students will gain a comprehensive understanding of the principles of sustainable chemistry, including green chemistry, life cycle assessment, and the 12 principles of green chemistry.
  2. Awareness of Global Sustainability Challenges: Students will develop awareness of the global sustainability challenges such as climate change, pollution, resource depletion, and biodiversity loss, and understand the role of chemistry in addressing these challenges.
  3. Application of Sustainable Chemistry Concepts: Students will learn to apply sustainable chemistry concepts and techniques to real-world problems, including the design of environmentally benign chemical processes, the development of sustainable materials, and the reduction of waste and pollution.

- **Course Syllabus:**

1. Introduction to Sustainable Chemistry
  - Basics of green chemistry and its importance in rural contexts
  - Overview of sustainability challenges facing rural communities
  - Role of chemistry in addressing local environmental and socio-economic issues
2. Chemistry for Rural Agriculture
  - Sustainable practices in soil management and crop protection
  - Use of bio-based fertilizers and pesticides
  - Application of nanotechnology in agriculture for enhanced efficiency
3. Water Chemistry and Management
  - Sustainable approaches to water purification and sanitation
  - Treatment of agricultural runoff and contamination
  - Harvesting rainwater and groundwater recharge techniques
4. Renewable Energy and Rural Development
  - Chemistry of biomass conversion for energy generation
  - Solar energy technologies and their implementation in rural areas
  - Biogas production and utilization for cooking and electricity.

- **Evaluation:**

Assessments of candidates will be done through theoretical assignments, projects/ seminars. After completion of course all successful candidates will be awarded certificates.

- **Course Teachers:**

1. Dr Washim Raja, Assistant Professor, Department of Chemistry, THLH Mahavidyalay
2. Amit Das, Assistant Professor, Department of Physics, THLH Mahavidyalay.

## Course Details

- **Course Title:** Add-on Certificate Course on Physics in Everyday Life.
- **Duration:** 30 hours
- **Course Date:** 13/11/2019 to 26/11/2019
- **Objectives:**
  - (i) Understand the fundamental principles of physics that underlie everyday experiences.
  - (ii) Develop a conceptual understanding of key physical principles.
  - (iii) Apply basic physics concepts to explain and predict simple situations encountered in daily life.
  - (iv) Appreciate the interdisciplinary nature of physics.
  - (v) Cultivate critical thinking skills by analysing real-world scenarios.
  - (vi) Understand how physics drives technological advancements.
- **Expected Outcomes:**
  - (i) Students will gain a deeper understanding of how physics concepts apply to everyday situations.
  - (ii) Participants will develop basic problem-solving skills related to physics.
  - (iii) Students will appreciate the interdisciplinary nature of physics.
  - (iv) By studying physics in context, students will enhance their scientific literacy.
  - (v) They will be better equipped to critically evaluate scientific claims and understand real-world phenomena.
  - (vi) Participants will gain practical insights into topics like transportation (speed, safety rules), sports (forces, motion), weather (global warming), and home electricity (appliances, safety).
- **Course Syllabus:**
  - (i) The Laws of Motion – skating physics, falling balls
  - (ii) The Laws of Motion Part II – wind turbine, cars and collisions
  - (iii) Mechanical Objects – carousels and roller coasters, seesaws
  - (iv) Momentum Fluids – hurricanes, hot air balloons, helium balloons
  - (v) Heat and Phase Transition – woodstoves, insulation
  - (vi) Thermodynamics – air conditioners and automobiles
  - (vii) Electricity – lightning rods, air cleaners, photocopies and electrical currents
  - (viii) Magnetism and electrodynamics – tape records, electric motors, hybrid car
  - (ix) Electronics – audio amplifiers, computers and electrical circuits
  - (x) Electromagnetic Waves – radio and television, microwave ovens
  - (xi) Light – sunlight, fluorescent light, lasers
  - (xii) Optics – optical recording, CD, DVD Player
  - (xiii) Modern Physics – nuclear weapons and nuclear reactors, medical imaging
  - (xiv) Physics of Climate Change.

**ADD ON COURSE ON  
HUMAN RIGHTS EDUCATION**  
Department of  
Political Science  
THLH Mahavidyalay  
(14<sup>th</sup> November to 19<sup>th</sup> November)  
Session: 2019-20

The issues of Human Rights are of utmost importance in the present society. Accordingly spreading the idea of Human Rights Education among all also has become important for protection and promotion of human rights. Human rights are inherent and integral part of every human life. The term 'Human Rights' refer to those rights

that are considered universal to humanity, regardless of citizenship, residency, status, ethnicity, gender or other considerations. Supported by several international conventions and treaties including the UDHR 1948, the Human rights include political, economic, social and cultural rights such as right to life, liberty, education and equality before law, right of association, belief, free speech, information, religion, movement and nationality. The UN Decade for Human Rights Education (1995-2004) defined Human Rights Education, "a lifelong process by which people at all levels of development and in all strata of society learn respect for the dignity of others and the means and methods of ensuring that respect in all societies." Thus imparting knowledge on Human Rights Education will teach all to respect the dignity of each other and to promote a healthy, cooperative and peaceful life in society. It is also the duty of the government to recognize the claims of the people; their exclusive and inalienable rights. Thus the true essence of democratic society lies with the recognition of these human rights as universal rights. This certificate course on Human Rights Education aims to develop the knowledge, skills and values of human rights to the young generations. Human Rights Education is a subject that aims to protect, promote and popularize the concept of Human Rights among all sections of society.

**Course Objective**

- >To help the learners for promoting respect for human rights of all individuals
- >To impart the knowledge, skills and values of Human Rights to all the learners
- >To aware the learners about the democratic values of rights, equality, justice, tolerance, humanity etc.
- >To sensitize the learners about overcoming the problems of human rights violation by any person, authority, agencies, institutions and

After completion of this certificate course the participants will-

- >Learn the basic perspective of Human Rights.
- >Gather information about the norms, procedure and mechanism against violations of Human Rights.
- >Able to participate freely and effectively in a democratic process.
- >Develop the knowledge and skills of protecting and promoting Human Right and preventing the violation of rights
