Changing Cultural Life of Santals: Past and Present

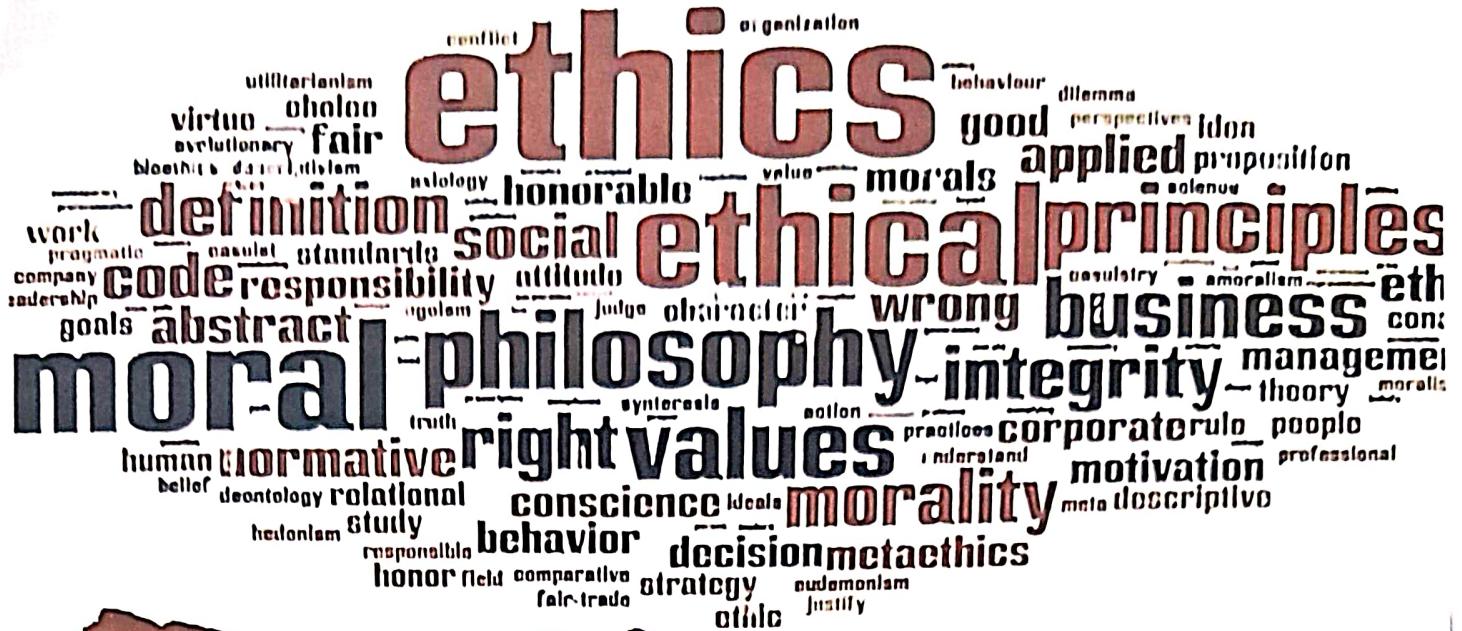

Amitesh Ray

India is the epitome of culture and ancient civilization of the world. This culture and civilization has been changed here gradually. As the Aryan culture has developed on the other hand non-Aryans also became noticeable. This non-Aryan race primarily belonged to the Santhal people. Santali tribe is the ancient among the other Indian tribes and they are the largest among other Indians. Geographically this tribe resides in these states; Orissa, Bihar, Jharkhand, West Bengal and Assam. In earlier days people did not know much about tribes as no such historical written documents were found. Writings about Santhal tribes emerged with Mr. E.G. Man's book "*Santhalia of and the Sonthal Pargana*" in 1867 an instance of fame and culture. After that many historians and missionaries wrote about themselves which helped readers to get a clear picture of Santhal tribes.

The quintessence of Indian culture and enigma is hidden under the roof of Santali language, behaviour and in lifestyle, that's why it is most important to know them well. This tribe is different among other races in India due to their rich cultural heritage and historical evolution. Studying their culture will introduce their present scenario. The main focus is their cultural life, evolution, how do Christian missionaries influenced their life and how do they transform their lives.

Santal words Origin and interpretation: In general, there is disagreement among historians about the origin and interpretation of the word Santal. But generally, Santals identify themselves as 'Hor Jati'. According to Mr. Skrefsrud, the word 'Santal' is derived from the corrupt pronunciation of the word 'Saontar', and is due to the residence of several generations at a place called 'Saont' in Midnipur District. Again, according to W. B. Oldham, the word 'Santal' is derived from the word 'Samantawala'. Linguist Suniti Kumar Chattopadhyay says the word 'Santal' derives from the Sanskrit word 'Samantapala', meaning 'Guardian of the frontier'.

Regarding these theories Mr. Bodding writes: - "That Sant and Saont are to derived from the (originally Sanskrit) word Samanta seems to be

Ethics in Buddhism and Jainism: A Comparative Discussion

Sk Nur Upsar

Assistant Professor

Dept. of Philosophy, THLH Mahavidyalay
Mallarpur, Dist.- Birbhum, West Bengal

Humans are social creatures. If he wants to live in the society, he has to move, get up and sit, behave with people of various professions of the society. Through these interactions, the ability or sense of right and wrong, good and bad behaviour is born in the individual. This sense of determining the good and bad of behaviour is basically what can be called as ethics or morality. Our common intelligence is our ethics, and our affection for good and aversion to evil is our morality. Since the dawn of civilization, human society has had many timeless morals. For example: to kill is injustice, violence is improper, compassion and tolerance should be practiced, charity and generosity should be encouraged, it is good to always speak the truth, not to indulge in lies, not to consume intoxicants etc. The above sayings of ethics include the injunctions to establish good in the society and to avoid evil from the society which is the subject of Indian ethics. The foundations of Indian ethics include the Vedas, the Upanishads, the Vedic philosophies (Samkhya, Yoga, Nyaya, Vaisesika, Mimamsa and Vedanta) and the non-Vedic philosophies (Charvak, Buddhist and Jain). In the present essay I intend to discuss and compare the ethical principles of Buddhism and Jainism, the two most influential schools of Vedic philosophy.

The source of Buddhist ethics is mainly Buddhist scriptures. Buddhist scriptures are written in Pali language. These are called 'Pitaks', which are three in number. Hence it is known as 'Tripitaka' (Vinaya Pitaka, Sutta Pitaka and Abhidhamma Pitaka).

SRI AUROBINDO: GOVERNMENT POLICY, TERRORISM AND VIOLENCE

Sk Nur Upsar

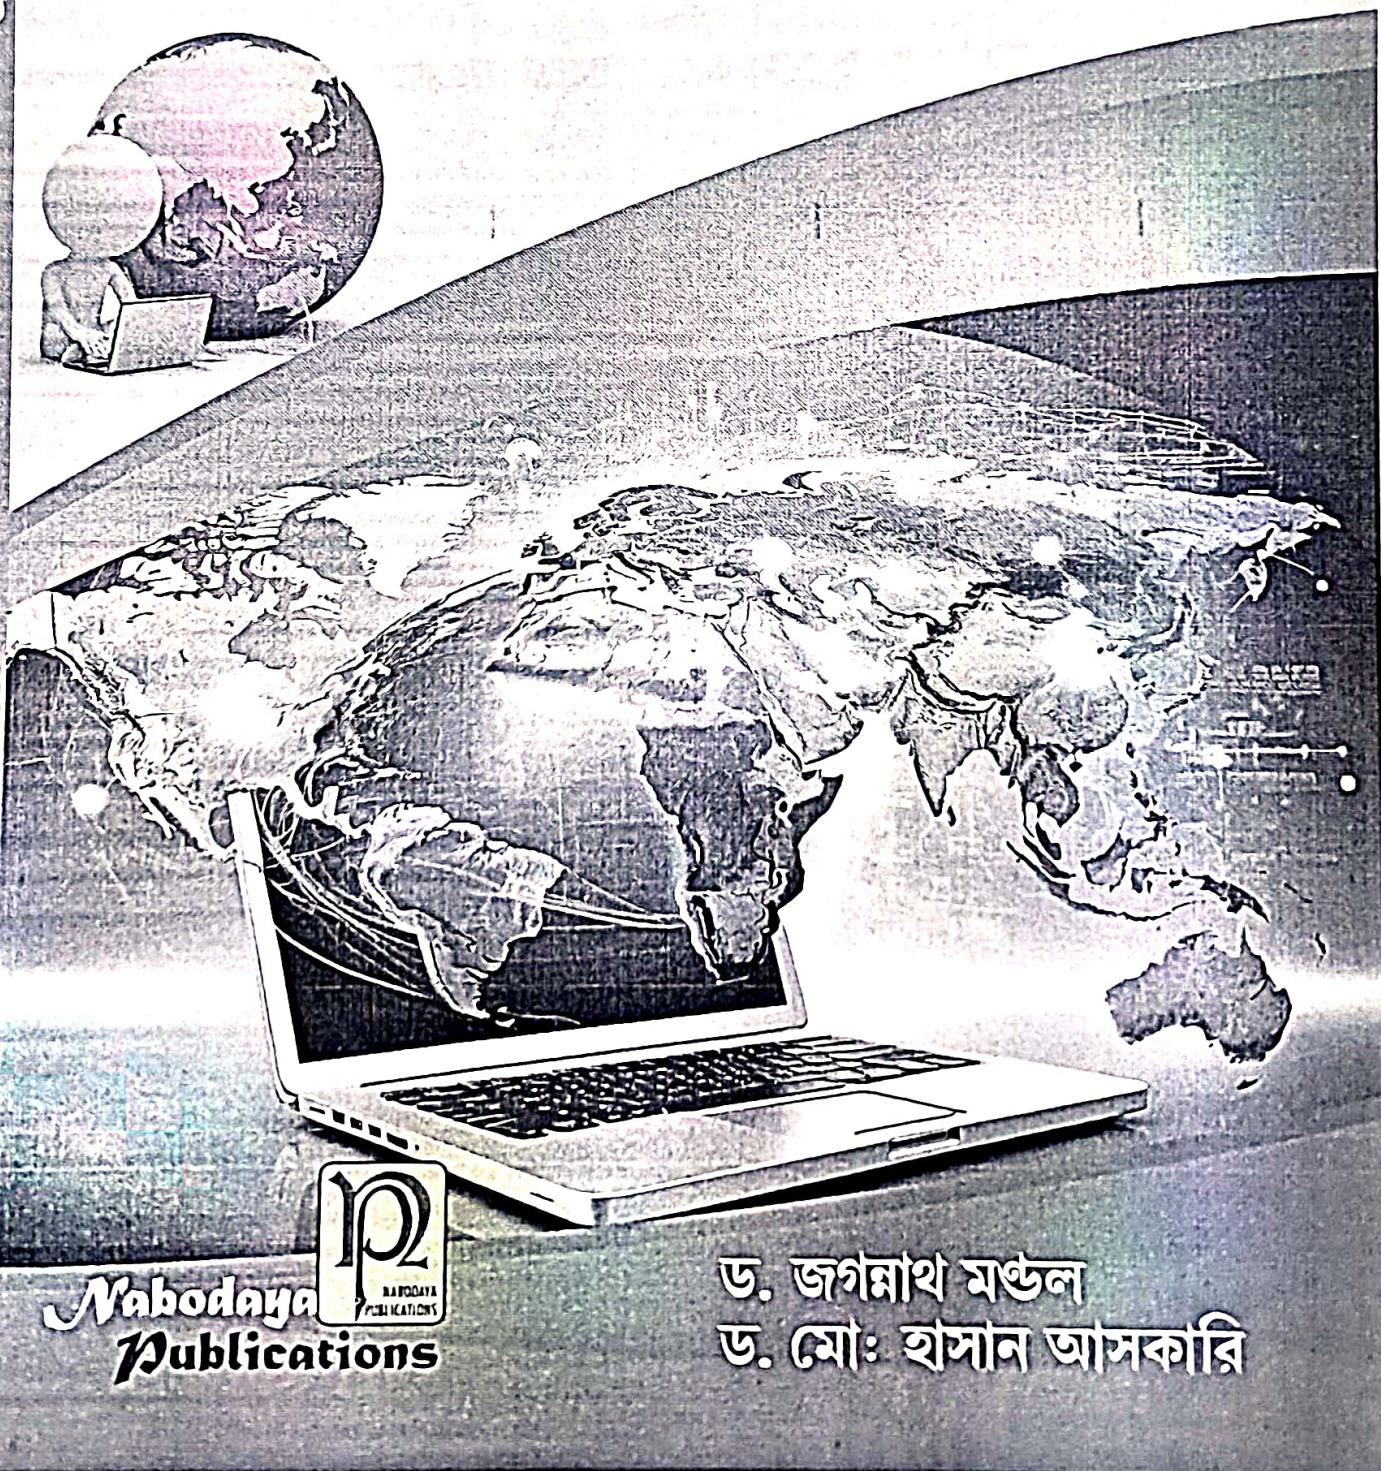

Aurobindo Ghosh was born to surgeon Krishna Dhan Ghose and Swarnalata Devi in Calcutta on August 15, 1872. In Indian thought, it is commonly believed that there is a basic unity of Indian culture running through the diversities of different provinces, castes, regions, language, customs and creeds. In the extreme moment of Indian National Movement (1900-1910) Sri Aurobindo took an active part in developing the Indian mind to advocate the most desirable demand for Freedom and making his beloved Motherland liberated from the shackle of foreign rule for more than two decades. He was thought to be a renowned extremist in nature and he even was arrested by the British Army in its charge (Maniktala Bomb Case) in 1909 and released him just before his sacred departure towards Pondicherry in 1910. Sri Aurobindo was one of the major figures in the history of the Indian renaissance and Indian nationalism. His moral, intellectual and spiritual accomplishments have cast a deep influence over the mind of the Indian intelligentsia. Since the publication of his magnum opus. The Life Divine, the attention of some of the leading intellectuals of the world has been drawn to him and Savitri, his epic poem, is considered by some to herald a new era in the realm of spiritual poetry. Certainly, he has been one of the most systematic and learned of all modern Indian thinkers. Tagore, who was greatly impressed by the luminous personality of Aurobindo, stated that through his India would express his message to the world. Aurobindo was indeed a versatile genius-poet, metaphysician, seer, patriot, lover of humanity and a
